

XLure® 16 WEEK LURES

Professional Pheromone Management Systems

XLure is the first system to use color coding to tell at a glance whether the pheromone lures have been replaced on schedule.

Designed to coordinate with the 4 quarters of the year, XLure 16 Week Lures are available in blue, green, red & yellow and can be replaced every 12 weeks. Use blue for winter, green for spring, red for summer and yellow for fall. Even under the 12 week schedule, these lures still last 3 times longer (10 weeks) than conventional lures.

ACTIVE LIFE: 16 WEEKS SHELF LIFE: 2-3 YEARS STORAGE: NO REFRIGERATION

PACKAGED: PE DISPENSER; EACH DISPENSER IS INDIVIDUALLY SEALED IN A FOIL POUCH
